

Bracci New Performance Moss Leather.

Bracci together with some top Italian tanneries has developed a new performance moisture and stain resistance aniline leather called Moss.

Moss is a aniline cow leather of European origin with a very soft peach hand, savage nubuk look and amazing depth of color. This aniline leather goes through a special tanning process which makes it a performance aniline leather moisture and stain resistant. Natural variations in grain and color shade are prized qualities of this sublime material, often with characteristics such as color variation, scarring, stretch marks, wrinkles which emphasize the beauty of this leather and confirm that the hides are very high quality. Thickness 1.3/1.5mm.

Cleaning Instructions

It is possible to clean accidentals stains or spills such as ketchup, mayonnaise, red wine, coffee, olive oil and coca cola which are all here below described as contaminants.

It is **NOT** possible to clean ink.

Cleaning procedure:

- Absorb contaminant gently with a paper towel.
- Then use a white cloth and with round movements gently clean the surface until contaminant is removed. Change the white cloth and continue gently in round movements until no contaminants are transfer to white cloth.
- At last, only if there is still a halo stain, wet a white cloth with distilled water and gently with round movements clean the surface of the leather.
