luxury leather collection

Starting from here, the work of a lifetime, to imagine a new future.

This is what Mauro Bracciale has done, now owner of Bracci and for more than 30 years in the leather upholstery business, managing important Italian sofa manufacturers.

Bracci was established in 2012 with the idea to bring to the North American market a collection designed and made in Italy. But not only !...Bracci sofas are specially designed to have a remarkable US personality, meaning that product development is done in Italy with only the North America market in mind.

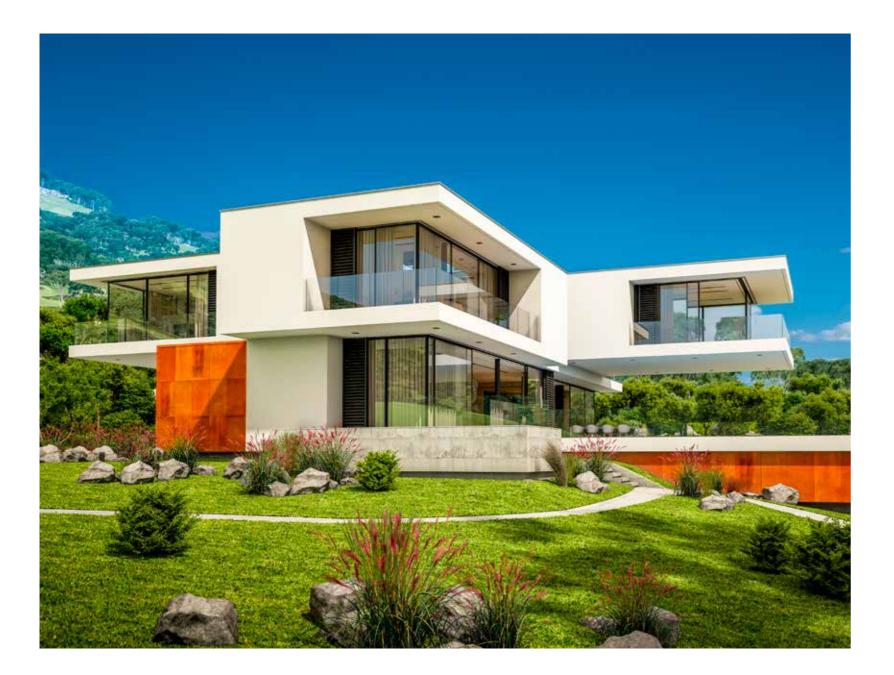

Mauro Bracciale's great propensity to research new ideas, of style and customization, throughout the years has put together a great selection of products in all categories: stationary, power motion, power recliners, occasional chairs and sofa beds.

Bracci is a brand that means design, craftsmanship and italianity, a brand strongly thought and wanted by its founder, a brand that could not fail to inherit from him passion and authenticity.

An armchair is first and foremost comfort. The body finds space between the padding that embraces and welcomes it in the most ergonomic of ways. Inside, the technological core follows the natural movements of the body, allowing you to relax your legs, arms, head, and thoughts. An armchair whose design actually means beauty and functionality, an armchair that brings the Made in Bracci and Made in Italy style into the most contemporary American living room.
